Introduction

In their new book “Taming the Truffle” (Timber Press 2008) Ian Hall, Gordon Brown and Alessandra Zambonelli have abandoned the normal scientific convention of using reference citations to make the text flow more smoothly. Instead for those who would like to delve deeper into the literature two files are available on Truffles & Mushrooms (Consulting) Ltd’s web site www.trufflesandmushrooms.co.nz/page9.html. This file “[Taming the Truffle - Position of references 071027.pdf](#)” lists where each reference relates to the text of the book paragraph by paragraph and page by page. The second file ([Taming the Truffle - References edited plus additions 071027.pdf](#)) is an edited and expanded list of references to the one in the back of the book.

Recent publications that present new information that alter or undermine the conclusions drawn in our book are in **red text** below.

The location of information on the World Wide Web is constantly changing. Consequently, if one of the Web references is out of date, go to the home page and try the search option if there is one or the site map. If this fails, try a good search engine such as Google. If you find an out of date link please send the correct link to Ian Hall at truffle1@ihug.co.nz We also welcome suggested additions to the references and where they relate to the text of our book. Could you please send these to Ian Hall at truffle1@ihug.co.nz We will endeavour to update both files at least annually.

Position of references

In the table below headings in the book are counted as paragraphs.

Chapter	Page	Para.	References
1	17	3	Zhang & Wang 1990
